Summary

Software Engineer and builder with hands-on experience across data pipelines, machine learning and Generative AI — spanning feature engineering, model evaluation and real-world deployed projects. Open-source contributor, FOSS speaker and IEEE Volunteer

Education

KPR Institute of Engineering and Technology **Sep. 2023 – May 2027**
Bachelor of Technology in Computer Science and Business Systems *Coimbatore, Tamil Nadu*
- Honours in Cloud Computing **CGPA: 8.37/10**

Experience

Finsight Analytics LLP **January 2025 – April 2025**
Machine Learning Intern *Coimbatore, Tamil Nadu*
- Built ML pipelines on financial datasets using feature engineering and model tuning to improve forecast accuracy
- Designed a RAG system for legal query resolution across CGST and Income Tax Act documents using LangChain and ChromaDB
- Explored LLM fine-tuning using Gemma via Ollama and evaluated models on HuggingFace Spaces for domain-specific tasks

Projects

Heimdall MCP Server | *TypeScript, Bun, MCP SDK, JSON-RPC* **github.com/sarva-20/heimdall-mcp**
- Designed and implemented 33 MCP tool definitions across 6 categories, making macOS system capabilities consumable by any LLM agent layer via a structured JSON-RPC interface over stdio
- Achieved sub-3-second execution latency across all tool invocations by leveraging Bun's native TypeScript runtime
- Published open-source under MIT license, listed on mcpservers.org; shipped as full monorepo with landing page and interactive command playground

SubscriptionOps | *Python, dbt, DuckDB, Airflow, Docker* **github.com/sarva-20/subscriptionOPS**
- Built a full data pipeline modeling SaaS subscription analytics – users, payments and churn from raw data to clean, business-ready reports
- Designed a churn tracking model separating voluntary vs. involuntary cancellations, backed by 26+ automated data quality checks
- Automated the entire pipeline end-to-end with scheduled runs, containerized setup, and continuous testing on every code change

Technical Skills

AI/ML: Feature Engineering, RAG, LangChain, ChromaDB, Ollama
Languages: Java, SQL, TypeScript, Python
Backend and Frameworks: FastAPI, REST API, Bun, MCP SDK
Data and Tools: dbt, Docker, Git, GitHub, Vercel, Render, AWS, HuggingFace

Achievements and Certifications

Linux Foundation Shubhra Kar Scholarship 2026 - 1 of 500 recipients worldwide, Open Source Newbie category **2026**

Merged Contributor - OpenHands (All Hands AI), PR #12243, Bug fix + unit tests **2026**

Top 5 Finalist - Design Spark Challenge, Intellect Design Arena **2026**

2nd Place - Hackfest'25, Chettinad College of Engineering and Technology **2025**

AWS Certified Cloud Practitioner - Amazon Web Services **2026**

AWS Certified AI Practitioner - Amazon Web Services **2026**

Oracle Certified AI Foundations Associate - Oracle **2025**
